LED indoor light sensor

RS 200. Premiere!
Indoor light with Bluetooth
Connect connectivity.

The RS 200 is the first Connect LED indoor light in our indoor range for ceilings and walls. This means that it can be easily adjusted, networked and operated via Bluetooth. No cable. No stress. The light comes in a high-quality, anthracite-coloured aluminium enclosure and boasts an intelligent soft light start alongside the 360° high-frequency sensor. In this way, you automatically create an all-round beautiful room atmosphere, which is rounded off by an ambient light on the wall.
